

```
//Destructuring array assignment
const [ name, fans ] = [ 'Proful', 6345 ]

//Destructuring object assignment
const { name, fans } = { name: 'Proful', fans: 6345 }
```

```
const twits = [ { name: 'Proful', followers: 6345 },
                 { name: 'Rakesh', followers: 5435 } ]

//Destructuring inside loops
for (const { name, followers } of twits) {
  console.log(`${name} has ${followers} followers`)
}
```

# DESTRUCTURING

```
const {name, ...details} = { name: 'Proful',
                              fans: 6345,
                              city: 'Jeypore' }

// details => { fans: 6345, city: 'Jeypore' }
```

```
//Default values during destructuring
const months = [31, 28]
const [jan = 31, feb = 29, mar = 31] = months
//jan => 31, feb => 28, mar => 31
```

```
function display({name, fans: followers}) {
  console.log(`${name} has ${followers} fans`)
}

const twit = { name: 'Proful', fans: 6345 }
display(twit)
```
